USB contacts

blinking blue light
stable blue light
means full charged

Setting The Time

- . When screen is black, press the **top** button once to display the time.
- . Quickly hold down the **top** button until the hours flash, Press top button to increase the hours, or the bottom button to decrease.
- . Quickly hold down the **top** button until the minutes flash, Press top button to increase the hours, or the bottom button to decrease.
- . Quickly hold down the **top** button until 12H or 24H show, press any button to select 12 hour or 24 hour format.

Tips: When screen is black, keep press the top button to see Time, battery lever (90 ≡), 9:00, Alarm 1 time, A1OF

Setting Alarms

- . **To set the alarm time:** Press the top button repeatedly until the first alarm screen appears (9:00). That screen marks the beginning of the 15 alarms available. Pressing the top button from that point advances through each alarm setting screen. **Note: alarm times come first, followed by the associated alarm number, which can be turned on or off (e.g., A1OF/ON).** when the desired alarm time appears (for example alarm 1 time 10:00), hold down the top button until hours flash, press top button to increase the hours

or bottom button to decrease. hold down the top button until the minutes flash, press top button to increase, or bottom button to decrease.

- . **To turn the Individual alarm on/off :** After alarm minutes chosen, quickly hold down top button to see A1OF (or when screen is off, press top button over and over to see A1OF), Now press bottom button can switch to A1ON.
- . Continue to press the **top** button to cycle through all the next alarms, repeat above to modify.

Tips: If you set **Alarm 1 time, A1 ON, Alarm 2 time, A2 OF**, the alarm 2 will not vibration.

Setting The Timer

- **To turn the timer on:** When screen is off, press the **bottom** button repeatedly to display Cdn, 1, 5, 10, 15, 20, 30, 45, 60, 90, 120, 180 min, When you reach your desired interval hold down the **bottom** button until “ON” appears.
- Now press the **bottom** button to see time remaining, press again is current time, and again is battery level.
- **When timer is on, all the color icons will flash and jump from one to another.**
- **To turn the timer off:** Press any button to display the time remaining, quickly hold down the **bottom** button for 4 seconds until “OFF” appears.
- **Tip: If you want to change the alarm and current time after setting the timer, first turn off the timer.**
- **Quickly turn on/off the alarm** : when you see the alarm you want to turn on/off, for example, when you see A1OF, press the bottom button can switch to A1ON (**a clock symbol will appear** ), keep press bottom button to A1OF.
- **Mute Mode** : This will temporarily deactivate vibration for all alarms and timer setting. Hold both buttons together for 3 seconds until “SIL” show (**a red silent icon will appear** ).
- **Vibrate Mode:** Hold both buttons for 3 seconds to reactivate vibration for all alarms and timer setting. “VIB” will show.

• **Lock Button**

Prevent accidental changes to programmed settings. when screen is off, press top button once to see “Time”, hold down the bottom button for 5 seconds in “Time” screen to lock, **a pink lock icon will appear** , continue to hold down the bottom button for 5 seconds in “Time” screen to unlock, **the pink lock icon will disappear.**

Lock button in timer mode: when screen is black, press bottom button twice to see current time, hold down bottom button until the pink lock icon appear to lock the button, continue to hold down bottom button until the pink lock icon disappear to unlock the button.

Notes

- **You can't do any change in Lock Button mode, unlock first then change the setting.**
- Only when you press the button the watch will be lit and show the time.
- The watch is waterproof in normal life, but can not be used in the swimming pool, If got wet, try to dry it with hairdryer or days later to charge .
- Alarm 1 has a longer alarm time-60 seconds-to be used as a wake-up alarm, you also can set another two more alarms to be snooze function.
- All other alarms are 30 seconds long.
- The vibration can be stopped immediately by pressing any button.
- Alarms automatically repeat on schedule daily.
- When the Alarms goes off, vibrates with time flashing to remind.
- When the Timer goes off, vibrates only, totally discreet.

Troubleshooting Guide

If the alarms don't vibrate:

- Press any button when the watch is charging to check the vibrator.
- Make sure the alarm is turned on.
- Check the watch is mute mode or vibrate mode.
